Introduction

Started with the mission to create sustainable future with set forth plastic into circular economy by recycling almost all types of plastic waste. We have set-up our recycling facility in Indore, Madhya Pradesh and we collect plastic waste material for reprocessing from various sources like Municipal Bodies, Scrap Traders, Kabadiwala's Industries etc. and reprocess them into new products that can be used for various applications in broad spectrum of industries segment

waste is recycled rather than dumped in landfills where it can take hundreds of years to decompose

We aim to develop a culture of recycling among people so that they can contribute towards creating an environment and circular economy.

Our company operates with a vision to make India free from plastic waste pollution with an aim to provide sustainable solutions for the management of plastic waste through resource recovery. To this end, we have developed a state-of-the art resource recovery facility that converts contaminated plastic into high quality commodities which are then recycled into various products

"As an individual or business, it is always best to recycle or dispose of your plastic waste in an environmentally friendly way. This will help the environment and people who live there."

~ Puneet Jain
Managing Director

Our Mission

We are next-generation enterprise that develops, deploys and manages waste to wealth solutions.

1. Our business model is based on the principles of circular economy where we convert waste into useful products or back into resources.
2. The mission at Enviro RECYCLEAN is to turn our cities into places where people & environment thrive with sustainability.
3. We strive towards making 100% sustainable product through waste.

Our Vision

Enviro RECYCLEAN Private limited is a company which work for the "world without waste" and creating value by recycling and reusing resource. Today, where our daily use of plastic leading to increased rate of waste generation per capita, We need to manage waste in environmentally sound manner but also avoid depletion of natural resource by putting maximum **resource back into the loop** of **circular economy** & create **sustainable future** for our next generations.

Our Solutions

Post-consumer Plastic Waste Management

Extended Producers Responsibility (EPR)

Industrial Plastic Waste Management

Recycled Plastic Products

Post-consumer waste management

We provide end-to-end waste management solution (i.e. collection, segregation, logistics & recycling/disposal) for post-consumer plastic waste. Our vast network of collection partners in all states of India for the collection of plastic waste includes ragpickers, collection centers, aggregators, state & city level municipal tie-ups allows us to collect enormous amounts of post-consumer plastic waste and create social & environmental impact

OUR CLIENTS

Brands	**Producers**	**PROs**
Importers	**ULBs**	**Companies**

Adding Value To Environment

Industrial Waste Management

Waste produced by industrial activity is a trouble for many businesses. This type of waste can be recycled and reused, which is what we specialize in at the conversion company. Our goal is to make sure that all types of post-industrial waste are properly managed efficiently & effectively.

Recycling protect the environment
by reducing waste and conserving resources.

ZERO
WASTE

Extended Producer's Responsibility (EPR)

Extended Producer Responsibility (EPR) is a responsibility Producers, Importers, Brand Owners (PIBOS) for environmentally sound disposal / recycling of post-consumer waste under The Plastic Waste Management Rules, 2016.

The Plastic Waste Management Rules, 2016 was implemented to ensure that the producers/ manufacturers take responsibility for collection, storage, transportation and processing of plastic waste.

Enviro RECYCLEAN works with all types of brands in all industry segment for their post-consumer plastic waste management & Extended producers responsibility Compliance, Our Network allows us to work in all state and provide holistic comprehensive waste management service, **We are registered with CPCB/MPPCB (Central Pollution Control Board & Madhya Pradesh Pollution Control Board)**

We also work with **PROs, Agencies, Consultants & Other Companies.**

Reprocessed Plastic Granules

We are one of the leading manufacturers in India for re-processed plastic granules, which is further used to make various products. The recycled plastic waste that is provided by our clients is processed with advanced technology & under supervision of expert engineers.

Our goal is consistently high-quality products with customer satisfaction. We are committed to producing the highest quality products, providing the best service and achieving excellent results for our customers.

Reprocessed Plastic Granules

All types of Plastic Granules

Recycled Products

Our products are made from post-consumer and post-industrial waste, which is beneficial because it wastes less of the Earth’s resources.

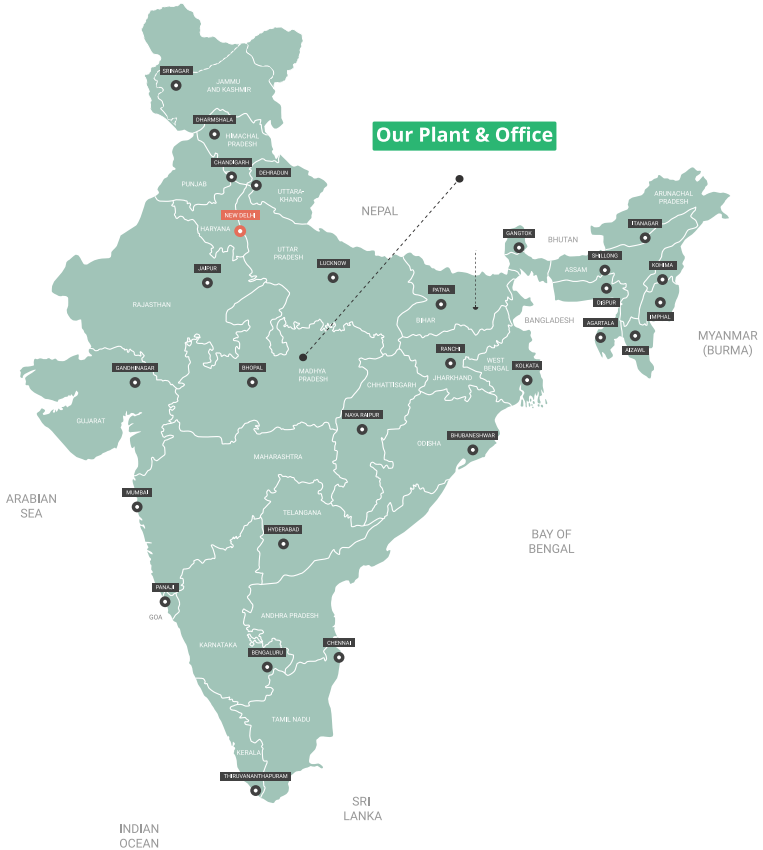

By using recycled materials we keep these things out of landfills and they aren't being produced from scratch. This saves a lot of waste that would otherwise be dumped into the environment as well as time and money that

Our broad spectrum of products include tiles, bins, furniture's, sheets, roofing sheets, tea coasters, desk-tables, planks, fences, benches etc.

PRODUCTS FROM POST-CONSUMER RECYCLED PLASTIC

Products from Post-Consumer Recycled Plastic: Advancing Sustainability Recycling is one of the cornerstone solutions for addressing environmental challenges and promoting sustainability. By utilizing post-consumer recycled plastic, companies are helping to create a circular economy, reducing waste, and conserving natural resources. Enviro Recyclean Private Limited, a leader in this domain, is dedicated to innovating sustainable solutions through continuous research and development. Our latest breakthrough involves the creation of a wide range of high-quality products derived from multilayered plastic waste. This innovation marks a significant step forward in repurposing materials that were previously considered challenging to recycle.

Network

We have a strong network of rag-pickers who collect waste from all over India, and we also have collection centres to sort the materials before they are transferred to recycling partners.

We work with local municipal bodies (ULBs) for bulk waste collection. We also ensure environmentally sound recycling/ disposal of collected waste.

OUR Network Comprises of

- Rag-pickers ('Safai-Saathis')
- Collection Partners
- Logistic Partners
- ULBs Tie-ups
- Recycling/Disposal Plants

Our Plant

Located in Rajoda District of Indore, Madhya Pradesh, India

We have a plant which is spread over a sprawling area of 1 Lakh sq. ft. , with the latest technology for recycling all types of plastic. We have adequate power supply which helps us to work interruptedly. We also have continuous water supply, which is also re-used in again and again. Our plant has skilled labours who are dedicated towards the work.

We have skilled and semi-skilled labour
